SUMMARY

Full-stack engineer with 4+ years building scalable web applications using Django REST Framework, Next.js, and AWS. Strong experience with payments, backend architecture, real-time systems, and production deployments. Delivered 20+ full-stack solutions across fintech, logistics, and e-commerce.

EXPERIENCE

- Software Engineer (Remote), UltimateMobileApps**

08/2025 – Present | Maine, US

 - 20+ full-stack applications as part of an 80-project suite.
 - Strengthened cloud workflows using AWS App Runner, ECS, Amplify, and ELB for deployments.
 - Led development of Liberty Social, a next-gen social media platform addressing Facebook’s complexity and privacy excesses.
 - Built multiple frontend-heavy user flows (forms, dashboards, interactive components, data-driven UIs) in React/Next.js with TypeScript.
 - Shipped NoLimitFlix - a movie streaming platform (React Native + Nextjs) live on the App Store, Play Store, and web.
- Backend Developer, GigGap**

01/2026 – Present | Remote

 - building backend systems with Django and Django REST Framework.
 - managing cloud infrastructure with Terraform on AWS.
- Backend Developer, Goufer PLC**

05/2024 – 11/2024 | Lekki, Lagos

 - Built 15+ API endpoints serving 1,000+ daily vendors and users.
 - Created real-time chat using Django Channels.
 - Integrated Twilio for phone verification (reduced fake signups by 40%).
 - Improved API performance by 35% via query optimization.
- Freelance Developer, Upwork**

2021 – 12/2025 | Remote

 - Delivered 12+ projects for fintech, e-commerce, and education startups.
 - Built high-reliability payment systems with Paystack, Stripe, Flutterwave, and Monnify.
- Software Developer Intern, Zuri Team**

02/2020 – 08/2020 | Remote

 - Built APIs and collaborated on a CSV chunking service.

EDUCATION

- B.Sc. Computer Science, Olabisi Onabanjo University**

2021 – 2025 | Ago, Iwoye, Ogun, Nigeria

Grade: 4.44

Final Year Project: Accreditation management system (Django + PostgreSQL) - compliance tracking system with document analytics and reporting dashboards.

Best Graduating Student - Computer Science Department, 2025

PROJECTS

Liberty Social — Full-Stack Social Network,

10/2025 – 11/2025

DRF, Next.js, AWS, Postgres, Celery, Redis, Firebase

- A modern social network built to fix Facebook's clutter + privacy issues.
- Features: marketplace, posts, comments, real-time chat, media uploads, notifications, business pages.
- Fully deployed on AWS (App Runner + Amplify).
- Implemented complex UI flows (feeds, interactions, real-time updates, media layers) with a focus on speed, UX clarity, and consistent iteration based on user feedback.

GitHub: <https://github.com/carnage999-max/liberty-social> 

NoLimitFlix, React Native, Next.js, PostgreSQL, AWS.

- Movie streaming library and mood-based content picker, built end-to-end.
- Live on App Store, Play Store, and web (nolimitflix.com )

Fractional — Hedera Africa Hackathon Project,

Hedera, Next.js, Smart Contracts, Node.js

- End-to-end Web3 platform where creators mint NFTs, issue fractional FT shares, and distribute dividends.
- Implements tokens association, on-chain rewards, and wallet-based payouts.

GitHub: <https://github.com/carnage999-max/Fractional-> 

Live: <https://fractional-three.vercel.app> 

CSVByte - CSV Utility API,

Django-REST Framework, Supabase, Celery, Postgres

- Designed and built a microservice API for uploading, splitting, and compressing large CSV files.

GitHub: <https://github.com/carnage999-max/file-splitter-api> 

Student-Pay Platform,

07/2025 – Present

Django REST Framework, Next.js, Tailwind CSS

- Handles payment processing for 2,000+ students with automated reconciliation (99.8% accuracy).
- Integrated Paystack + Monnify with webhook verification.
- Reduced manual payment processing time by 80% for university administration.

GitHub: <https://github.com/carnage999-max/student-pay-frontend> 

TECHNICAL SKILLS

Backend

Python, Django, Django REST Framework, PostgreSQL, MySQL, Redis, Celery

Tools

Websockets, Git, Microservices, Progressive Web Applications(PWAs), WebSockets, Django Channels

Payment Gateways

Paystack, Flutterwave, Stripe, Monnify

Frontend and UI/UX Technologies

JavaScript, React, Next.js, Tailwind CSS, HTML5, CSS3, TypeScript, React Query, Zustand

Cloud & DevOps

Docker, CI/CD (GitHub Actions), GCP, Ubuntu, AWS

Testing

Pytest, API Testing, Postman, Swagger, ESLint

CAREER FOCUS

Interested in building and scaling products - from backend APIs to mobile apps - that solve real problems for real users.
